Art Unit: 1714

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-3, 6-8, 11-13, 15-17, 19-21, and 25-27 are rejected under 35 U.S.C. 102(b) as being anticipated by JP Patent Bulletin No 60-17174 Ikeda et al..

Ikeda discloses the instantly claimed invention at page 1, claim 1; page 2, lines 1-35, particularly 22-35; page 3, lines 1-36, particularly 19-23; page 4, lines 9 and 12 of which the sulfonic acid salt is a "salt of a hydrophobic acid", page 6, table 1. Prior to mixing, the ingredients of the reference fall within the instantly claimed "kit".

4. Claims 1-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP Patent Bulletin No 60-17174 Ikeda et al. in view of DE 3215890 Grochal et al. (translated by applicant).

References to Grochal refer to the translation supplied by the applicant.

Ikeda discloses the instantly claimed invention at page 1, claim 1; page 2, lines 1-35, particularly 22-35; page 3, lines 1-36, particularly 19-23; page 4, lines 9 and 12 of which the

sulfonic acid salt is a "salt of a hydrophobic acid", page 6, table 1. Prior to mixing, the ingredients of the reference fall within the instantly claimed "kit". It would have been obvious to one of ordinary skill in the art at the time of the instant invention to treat the fillers of Ikeda according to the instant claims and with the instantly claimed compounds because the resulting properties disclosed by Grochal et al. would have been expected in the product of Ikeda.
